HX1 - LED High Bay
Zone 1, 2, 21 & 22

Zone 0,1,2/21/22

The HX1 is a high performance LED high bay luminaire, designed and certified for Zone 1, 2, 21 and 22 hazardous areas. The luminaire is designed to replace the conventional HID lamp technology which makes it energy efficient with high performance, low maintenance and long life span. It's suitable for wall, ceiling, pendant, pole and bracket mounting. The HX1 continues the proud heritage of NORDLAND LIGHTING's Ex safety standards whilst utilizing the latest LED technology.

NORDLAND LIGHTING

NFL - LED Flood

LED Floods

The NFL - LED Flood luminaire is aimed to provide superb lighting distribution with special designed optic lenses. This luminaire is not only used as a floodlight for sports or area lighting, but also as a perfect luminaire for building facade lighting. The Floodlight is designed to replace the conventional HID light sources and suitable for bracket and pole mounting. Modern design, simple and accessible enough, these energy efficient with high performance, low maintenance and long life span. The NFL - LED Flood continues the proud heritage of NORDLAND LIGHTING's quality standards.

NORDLAND LIGHTING

JBL5 LED

Vapour Proofs

The JBL5 LED linear luminaire range is a high-performance industrial vapour proof (IMC, glass fibre reinforced polyester) luminaire that has been designed to operate with LED strips. It's suitable for wall, ceiling, bracket and pole mounting. The JBL5 LED continues the proud heritage of NORDLAND LIGHTING's quality standards.

NORDLAND LIGHTING

N60LED-Ex
Zone 1, 2, 21 & 22

Linear

The N60LED-Ex linear luminaire range uses specially designed LED light sources and is paired with Ex certified LED drivers. The luminaire is designed to replace the conventional fluorescent lamps which makes it energy efficient with high performance, low maintenance and long life span. It's suitable for wall, ceiling, bracket and pole mounting. The N60LED-Ex continues the proud heritage of NORDLAND LIGHTING's Ex safety standards whilst utilizing the latest LED technology.

NORDLAND LIGHTING

MiniLite - LED

Haulage

The MiniLite - LED luminaire is designed to provide superb light distribution with its specially placed array of LEDs and clear polycarbonate lens. The robust motor and dust proof design makes the luminaire suitable for underground and surface areas. It has built-in ATEX-TRF electronics that ensures that MiniLite - LED will only function while connected to a paired power connection box. The MiniLite - LED can be supplied (optional) on Steel Wire Armoured (SWA) cables in various lengths and cable lengths to suit any customers need.

NORDLAND LIGHTING

NGB - LED

Bulkhead

The NGB - LED luminaire range is a high-performance industrial luminaire designed to replace the conventional HID lamps which makes it energy efficient with high performance, low maintenance and longer life span. It's suitable for wall, ceiling, bracket and pole mounting. The NGB - LED continues the proud heritage of NORDLAND LIGHTING's quality standards.

NORDLAND LIGHTING

NHL100 - LED Highbay

Highbay

The NHL100 LED high bay consist of a die-cast aluminium alloy body and is polyester spray powder coated, which makes it ideal for industrial indoor and outdoor applications. This luminaire provides high energy efficiency, excellent illumination, low maintenance and long lifespan. Various mounting options include Hook, Ceiling and Wall mount. The addition of ballast and Daylight sensors allows for even further energy savings especially in areas which are less occupied. Dial dimmer gear are also available on request. The NHL100 LED high bay continues the proud heritage of NORDLAND LIGHTING's quality standards.

NORDLAND LIGHTING

Nordland Lighting designs a wide range of Lighting Solutions which are locally manufactured to international safety and performance standards for hazardous, mining and industrial applications.

AREA ZONING – We set ourselves apart from our competitors by offering our Customer's area zoning to ensure the correct lighting is used in the right area. It is imperative to distinguish between different zones and the different lighting requirements to maintain ISO and OHS accreditations.

CUSTOM SOLUTIONS – We understand that not all our Customers are the same and we want to ensure that each one of our Customer's individual requirements are met by offering them custom lighting solutions in conjunction with our sales and technical team.

LIGHTING AUDITS – It is in our Customer's best interest to identify if there are a sufficient number of lights as per the required standards per square meter and the amount of Luminaires being utilised for that specific area and make recommendations thereof. We also assist our Customer's with the option to reduce their total output to ensure a more cost-effective solution.

LIGHTING DESIGNS – With more than 50 years' experience in the lighting industry Nordland Lighting also offers lighting design for both industrial and commercial projects, both new and old, as per the specifications to ensure the lighting is both aesthetically pleasing and ISO and OHS accredited.

PRODUCT DEVELOPMENT – Nordland Lighting is equipped with an in-house R&D test laboratory where we continuously review international trends and test new and innovative ideas to continually be at the forefront of lighting design and quality performance.

LOCALLY MANUFACTURED – We don't only supply world-class lighting products and services, but we also proudly manufacture our products locally in South Africa, in the heart of Muldersdrift with a staff compliment of 90 employees.
